American Sycamore (*Platanus occidentalis* L.)

A Bibliography

1911-1987

SHIH-CHANG HU, NORWIN E. LINNARTZ, AND PAUL Y. BURNS¹

The American sycamore (*Platanus occidentalis* L.) bibliography is the third in a series of southern hardwood bibliographies compiled by the faculty of the School of Forestry, Wildlife, and Fisheries. The first was *Sweetgum: A Bibliography 1906-1986*, School of Forestry, Wildlife, and Fisheries Research Report No. 13, June 1987, by S. C. Hu, P. J. Fogg, N. E. Linnartz, and P. Y. Burns. The second, published in June 1988 as Louisiana Agricultural Experiment Station Bulletin No. 794, was *Cottonwood (Populus deltoides Bartr.): A Bibliography 1897-1986*, by S. C. Hu.

Designed to aid foresters and scientists engaged in management or research on American sycamore, this publication covers the period 1911 (earliest citation) through 1987.

American sycamore is an important hardwood species in the United States. It occurs naturally in all states east of the Great Plains except Minnesota; its range extends from northeastern Mexico into Canada north of Lake Erie. The species has several other common names, including sycamore, American planetree, buttonball tree, and buttonwood.

Our list of references was compiled from a variety of sources, including professional and scientific journals, university and government publications, proceedings of meetings, and the on-line computerized service available through the Middleton Library of Louisiana State University.

Difficulty was encountered in our search because the word "sycamore" is commonly used in Europe to refer to the sycamore maple or planetree maple (*Acer pseudoplatanus* L.) and also because the sycamore (or sycamore) fig (*Ficus sycomorus*) in the Middle East is often called "sycamore."

We adopted a chronological order for the bibliography. Each reference is listed under its year of publication in alphabetical order by author. We used a four-digit system: the first two digits indicate the year of publication, and the last two digits show the number of the item within that year.

An author and a subject matter index have been provided. The subject categories are rather broad and somewhat subjective, but they will serve the reader in locating pertinent references. References are written in English unless otherwise indicated at the end of the citation. References covering more than one subject category have multiple listings, up to a maximum of three.

¹Associate Professor, Professor, and Professor Emeritus, respectively, School of Forestry, Wildlife, and Fisheries, Agricultural Experiment Station, LSU Agricultural Center, Baton Rouge, LA 70803. The authors acknowledge the contributions of our colleagues and the staff of LSU's Middleton Library.
